KEYMACRO 3.2.0.1 is the Windows-based PC version of KEYMACRO, a desktop automation software tool for macOS that helps you create efficient, error-free macros for MacBook Pro and other Mac computers. It is a free program that makes it easy to automate actions on your Mac, such as copy, move, paste, cut, rename, search for files and folders, run apps, browse folders, open, close, minimize and maximize windows, minimize, and minimize all applications. You can also create hotkeys or create a keyboard macro. For example, you can open all files of a certain type, close all windows of the same application, switch between apps, enter email addresses, open webpages, and perform other actions. You can record the current settings or use a predefined macro to save time and effort when repeating an operation. To save time, you can choose the options like the number of repetitions, repeat interval, and a directory where all the macros are saved. KEYMACRO supports most keyboard shortcuts for all commands. The application provides an intuitive graphical user interface, thus allowing users to run it without any issues. It also has a reminder system that automatically creates a new macro each time you start working on your Mac. KeyMACRO is compatible with macOS Mojave and macOS Catalina, thus enabling you to use it on your computer. Once you have launched the software, you will see a window that allows you to start a new macro. KeyMACRO lets you run the macro you have just recorded. As far as the technical aspect of the software is concerned, the program is simple to use and understand, so anyone can learn to use it

right after installing it. The developer has clearly explained the features of the software and offers tips for getting started. Once you have recorded a macro, you can export it as a text file or just copy it to your clipboard, which you can paste into any text editor of your choice. The program has an option to create keyboard shortcuts, which lets you create hotkeys on your Mac. You can record multiple macros for each command, and you can include other keyboard commands when using a macro. You can assign any keys to any command. The application is compatible with keyboard shortcuts that are used in OS X, so it can record keyboard shortcuts for any application, like the Home row for the app Dock. Moreover, the software can be used to perform media tasks, such as opening a photo in iPhoto 2edc1e01e8
